The Global Leadership Academy offers clear guidance and coaching for the development the young leaders of tomorrow.

The Global Leadership Academy (GLA) delivers transformative leadership training for youth ages 12 to 18 years old in order to help them uncover a purpose, fuelled by their passion, to bring about positive change in their communities. GLA has transformed the best practices in youth and leadership development theory by offering life-changing two week experienced-based programs in beautiful Victoria BC Canada and near Cambridge in Bury St. Edmunds in the UK. All programs include six months of one hour online follow-up coaching to ensure lasting results. Upon completing the program, participants boast an impressive portfolio of work demonstrating the knowledge they have gained. Youth also gain further support with their very own service DREAM Service project, a post-program undertaking that they create using their passions and leadership training supported by our expert leadership staff.

GLA has proven to be an invaluable resource to young people by offering them a boost in confidence, new successful habits and a portfolio to present with their future university applications. The program enables students to consider the connection between their passions and their studies to help them understand their place and direction moving forward as a young leader. Each student not only completes two weeks of training but hopefully a lifetime of personal change.
